

5th & 6th Grade School News:

The 5th/6th graders are working hard to finish up the school year strong. They are reviewing key concepts in Math class so they are ready to go for the next school year. In social studies we are ending the year learning about the different revolutions and the World Wars. They are cruising through religion and science. They are all anxiously waiting for the school year to be over and for their summer vacation to start. We are hoping this warm weather is going to be staying around for good this time. We had a great school year and look forward to all being together next year! God Bless, and we hope everyone has a great summer!
