

7th Grade News

This class has been busy the entire month of May. In science the students are creating a lesson plan with an assignment and experiment to teach to their class. They will present a similar lesson during our science fair to lower grade students. They have taught the lesson during social studies, too. In music they are creating songs and performing songs in class and during lunch. They will take a field trip to record songs this month. During religion class, each student created a game to enrich their understanding of the book *The Hobbit*. When that project is complete, they will get to play the games. As our school year is coming to a close, I am thankful that we were able to continue learning in person. God Bless and have a great summer!
